Mechanical Metal Sheet Shearing machine

1.25mmx2000mm

??? ??? ????

Description The shearing machine adopts the sliding guide rail, tension spring using sliding stationary, reducing the operating force by two-thirds, the shearing and machine can be equipped with a pressure loading device, high shearing quality, and lightweight, mobile convenience features. It is widely used in the sheet metal industry human cut material, the machine tool made of high alloy tool steel, edge durability.

Features:

- 1. The Manual shear is with a fully welded steel structure and high strength.
- 2. Strong cutting capability, and reduction of labor intensity.
- 3. The height of the foot pedal is low, easy operation.
- 4. Used for mild steel, aluminum copper, brass, zinc, plastic, and leads.
- 5. High carbon and chrome steel blade.

SPECIFICATIONS

Model	Max thickness of Plate(mm)	Max width of Plate(mm)	Back gauge range	G. weight/N. weight(kg)	Overall Dimension (mm)
1.25×2000	1.25	2000	0-700	600/511	2390 x 600 x 960
