Mechanical Metal Sheet Shearing Machine

1.5mmx1500mm

??? ??? ????

Description The shearing machine adopts the sliding guide rail, and tension spring using sliding stationary, reducing the operating force by two-thirds, the shearing can be equipped with a pressure loading device, high shearing quality, and lightweight, mobile convenience features. It is widely used in the sheet metal industry human cut material, the machine tool made of high alloy tool steel, edge durability. **Features:**

- 1. The Manual shear is with a fully welded steel structure and high strength.
 - 2. Strong cutting capability, and reduction of labor intensity.
 - 3. The foot pedal height is low, making it easy operation.
 - 4. High carbon and chrome steel blade.
- Used for mild steel, aluminum copper, brass zinc plastic, leads High carbon, and chrome steel blade.

SPECIFICATIONS

Model		Unit	1.5mmx1500mm
Shear plate thickness		mm	1.5
Shear plate width		mm	1500
shear plane angle		°	1°30'
stroke times		times/min	30
Dimension	L	mm	1850
	W	mm	1250
	H	mm	1100
Weight		KG	450
