Steel Bar Bending And Cutting Machine

RBC25

??? ? ?????? ?????? ?????

Description The RBC 25 rebar bending and cutting machine is a versatile tool that streamlines the cutting and bending processes into a single machine, significantly boosting overall operational efficiency. In terms of bending, it employs a dependable mechanical gear transmission system, ensuring reliability, user-friendliness, and simplified maintenance. With a set of dual-angle lockers, the machine allows for presetting bending angles, ranging from 0 to 180 degrees, accommodating various bending requirements. On the cutting front, the machine incorporates a hydraulic drive system, which delivers substantial cutting force and rapid cutting performance. It takes just 5 seconds to complete a cut, thanks to this efficient setup. To operate the machine, a straightforward and secure three-foot clutch system is employed, ensuring ease of use and safety during operation.

SPECIFICATIONS

Model	RBC-25
Voltage (V)	Single Phase 220V
Frequency (Hz)	60 Hz
Wattage (W)	1600 W
Min. Bending Capacity (mm)	6 mm
Max. Bending Capacity (mm)	25 mm
Bending Angle (°)	0-180°
Bending Speed (Sec)	5.0-6.0 s
Machine Dimensions(L×W×H) (mm)	500×450×790mm
Net Weight (Kg)	136Kg
Gross Weight (Kg)	150 Kg
