

Mechanical Metal Sheet Shearing Machine 1mmx1500mm ??? ??? ????

Mechanical Metal Sheet Shearing Machine

1mmx1500mm

??? ??? ????

Description The shearing machine adopts the sliding guide rail, tension spring using sliding stationary, reducing the operating force by two-thirds, the shearing and machine can be equipped with a pressure loading device, high shearing quality, and lightweight, mobile convenience features. It is widely used in the sheet metal industry human cut material, the machine tool made of high alloy tool steel, edge durability.

Features:

1. The Manual shear is with a fully welded steel structure and high strength.
2. Strong cutting capability, and reduction of labor intensity.
3. Foot pedal can extend and shorten freely.
4. The height of the foot pedal is low, easy operation.
5. Used for mild steel, aluminum copper, brass, zinc, plastic, and leads.
6. High carbon and chrome steel blade.

SPECIFICATIONS

Type	Unit	1x1500	
Shear plate thickness	mm	1	
Shear plate width	mm	1500	
shear plane angle	°	1°30'	
stroke times	times/min	30	
Dimension	L	mm	1800
	W	mm	1250
	H	mm	1100

Weight

KG

420

1. The Manual shear is with a fully welded steel structure and high strength.
2. Strong cutting capability, and reduction of labor intensity.
3. Used for mild steel, aluminum copper, brass, zinc, plastic, and leads.
4. High carbon and chrome steel blade.

Used for mild steel, aluminum copper, brass zinc plastic, leads High carbon, and chrome steel blade.

SPECIFICATIONS

Model	1.5x1050
Max.shearing thickness(mm)	1.5
Max.shearing width(mm)	1050
Back gauge range (mm)	0-300
Packing size(cm)	158x76x120
N.W./G.W. (kg)	378/438
