

Drill Vises

Drill Vises

Description

- Professional quality durable cast construction drill press vice, high hardness, and durability.
- Heightened and widened vice jaws for much more clamping force to keep the workpiece more stable during machining.
- Slotted base for easy installation and positioning.
- Fine machined bottom improved the precision of the contact surface between the vise and machine to ensure the precision of products.
- Widely used in milling machines, drill presses, and machinery maintenance, etc.

SPECIFICATIONS

model	width of the jaw(mm)	height of jaw(mm)	max opening of the jaw(mm)	G. weight/N. weight(kg)
160	160	48	120	28/27
120	120	35	100	19/18
