

Movable Tables

Movable Tables

Description:

PREMIUM QUALITY STRUCTURE: This movable tables is made of heavy-duty cast iron material, which is corrosion and rust-resistant, can withstand harsh environments, and is designed for long service life. **High Polish ability & Stiffness:** With excellent hardness and rigidity, the composite sliding table is highly polished and not easy to deform. **Three precise T-grooves** can meet different force requirements. **Adjustment of tightness:** equipped with several quality screws and nuts, you can easily adjust the tightness of this cross-cross-sled. **Convenient for your use.** **Wide application:** this milling cross table machine is great for mounting on a drill for precise positioning. It can be used for most types of milling and drilling, ideal for all drill stands, drilling, and milling machines.

Features:

1. Cross Slide Table enables any Dawn Vice to have a Cross Slide capability
2. Provides a cross-slide ability in the X and Y axis
3. Swivel base model has an additional rotary capability
4. Sturdy construction
5. Dial-indexed handle in 0.01mm graduations
6. T-slot vice mounting
7. Adjustable slide tension
8. Table position locking capability

Ideal for:

- Repetitive multi-axis work (drilling, machining, milling)
- Reducing setup times
- Ease of tool change for repetitive jobs
- Ease in-job maintenance
- Compounding operations into the single setup

SPECIFICATIONS

Table size(mm)	X-axis Travel(mm)	Y-axis Travel(mm)	Swing Cross
330×220	170	90	available
425×240	225	135	available
600×240	400	135	available
