

Rotary Tables

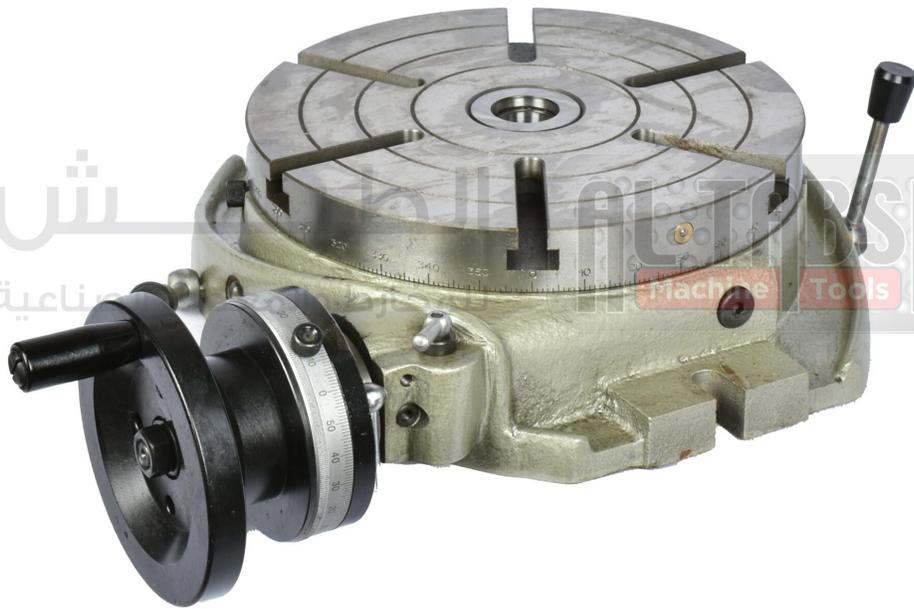

Image not found or type unknown

Rotary Tables

Descriptions Made from premium nodular cast iron, which ensures durability The vertical and horizontal table is one of the main accessories of milling machine. It can be used for indexing drilling or milling, circumferential cutting, boring a hole, and spot facing on milling machine. When the table in vertical with tailstock working together, it can be used on complex work for circular indexing drilling and milling. Enjoys strong stability and wonderful performance.

SPECIFICATIONS

Model	HRW160	HRW200	HRW250	HRW320	HRW400	HRW500
Rotary table diameter (mm)	160	200	250	320	400	500
Numbers of holes of Rotary table (Worm gear reduction ratio)	2	3	3	4	4	5
Position width (mm)	12	14	14	18	18	14
T-slot width (mm)	10	12	12	14	14	18
Worm wheel Transmission Proportion	1;90	1:90	1:90	1:90	1:90	1:120
Dividing accuracy	10"	10"	10"	10"	10"	10"

Net weight (Kg)	16.5	22.5	33.5	65	125	215
Goss weight (Kg)	21.5	31	44.5	76	150	238
