# Mechanical Metal Sheet Shearing Machine

1.5mmx1500mm

???

**Description** The shearing machine adopts the sliding guide rail, and tension spring using sliding stationary, reducing the operating force by two-thirds, the shearing can be equipped with a pressure loading device, high shearing quality, and lightweight, mobile convenience features. It is widely used in the sheet metal industry human cut material, the machine tool made of high alloy tool steel, edge durability. **Features:**

1. The Manual shear is with a fully welded steel structure and high strength.
2. Strong cutting capability, and reduction of labor intensity.
3. The foot pedal height is low, making it easy operation.
4. High carbon and chrome steel blade.

Used for mild steel, aluminum copper, brass zinc plastic, leads High carbon, and chrome steel blade.

## SPECIFICATIONS

Model	Unit	1.5mmx1500mm	
Shear plate thickness	mm	1.5	
Shear plate width	mm	1500	
shear plane angle	°	1°30'	
stroke times	times/min	30	
Dimension	L	mm	1850
	W	mm	1250
	H	mm	1100
Weight	KG	450
